### **DETAILED ACTION**

## **Priority**

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-5, drawn to process of producing an electrophotographic member, classified in class 430, subclass 127.
- II. Claims 6-8, drawn to an apparatus, cartridge and member, classified in class 430, subclass 56The inventions are distinct, each from the other because of the following reasons:
- 3. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product made can be made by laser beam treatment of the coating.
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/775,078 Page 3

Art Unit: 1756

5. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

- 6. During a telephone conversation with Mr. Saxon on 9/21/05 a provisional election was made with traverse to prosecute the invention of I, claims 1-5. Affirmation of this election must be made by applicant in replying to this Office action. Claims 6-8 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshihara et al [5362588] in view of Swain et al [5418349], Meyer et al. [5661872], and Smith et al [3741643]. Yoshihara et al teaches the removal of an edge, the circumferential end

section to provide a spacer or a sealing member for an electrophotographic photosensitive member. The edge is removed by cutting the dried coated member. Yoshihara et al fails to teach the use of an air jet to clean the cutting from the photosensitive member. Swain teaches the use of a laser beam to reduce the thickness of a polymeric photoconductive coating and uses and cleans the surface by a jet of inert gas note Col.5 lines 10-15. Meyer et al also teaches the use of air jet to clean a surface of a workpiece. Smith cleans the surface of a photoconductor with an air jet and teaches the importance of the angle of incidence of the jet nozzle. It would be obvious to one of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to use air jet means to clean the cuttings from the edge of a photoconductor.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John L. Goodrow whose telephone number is 571-272-1384. The examiner can normally be reached on Monday -Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark F. Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
